

Capability Statement

Marine Aggregates

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to the marine aggregates sector

Our Vision

To work collaboratively with our clients, and with due consideration for the sensitivity of the marine environment, to provide consistently high quality, reliable advice regarding the planning, consenting, development, operation and monitoring of their sites.

MarineSpace has significant expertise in developing, consenting and maintaining marine aggregate extraction sites. Considered to be one of the most experienced consultancies in the UK in this regard, MarineSpace can assist developers during all stages of projects from prospecting and exploration, to maintenance, operation and monitoring and final hand back following cessation of activities.

Specifically, MarineSpace is able to provide the following services and products to the marine aggregate dredging industry:

- Advice and site selection support for tender rounds;
- EIA scoping for aggregate sites and full EIA and Environmental Statement documents;
- Production of individual EIA chapters and/or technical input into EIA documents;
- Project Management of entire EIA process;
- Technical review of ES's/EIA supporting reports;
- Cumulative Impact Assessment, Inter-Related Impact Assessment and HRA;
- Consent compliance including management of licences on our clients behalf;
- GIS and data management;
- Marine survey design and management (geophysical, geotechnical, benthic, fish, archaeology, ornithology) Client reps/QC's for offshore survey work; and,
- Analysis and reporting of marine survey data on behalf of our clients.

Consultancy, Consenting and Compliance Services for Marine Developers

Capability Statement

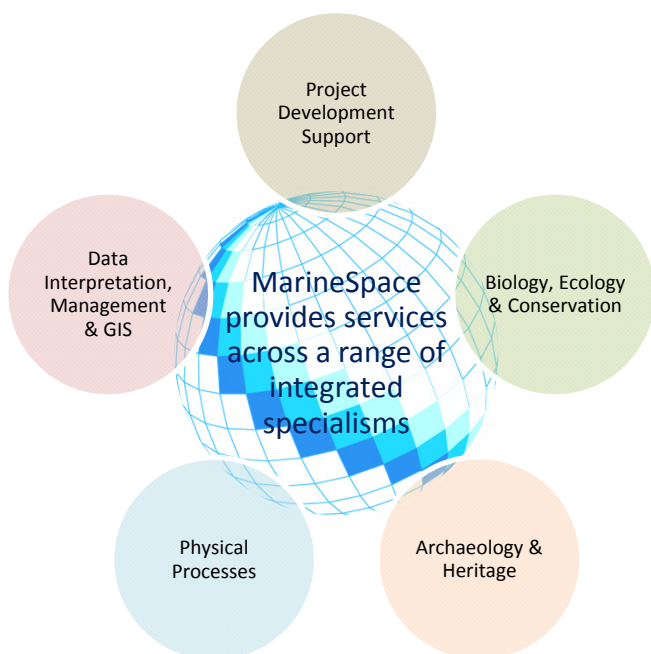

Marine Aggregates

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to the marine aggregates sector

Key Benefits of Using MarineSpace

- Extremely experienced staff
- Strong work ethic and project delivery track record
- Extensive knowledge of UK marine consenting and environmental issues
- Excellent knowledge of the UK regulatory process for all marine developments
- Expertise across a range of industries
- Ability to deliver both high-level strategic and targeted technical advice

Project Case Study

MarineSpace was contracted by Hanson Aggregates Marine Ltd to produce an Environmental Statement (ES) for Area 106 and 400. The ES utilised the results of regional work completed by the marine aggregate industry collaboratively to provide much of the baseline description for the site. However, significant additional data both within the public domain, as well as within studies specified, managed and delivered as part of the ES development, were incorporated into the ES.

The Environmental Impact Assessment itself utilised a tried and tested methodology, utilising GIS where possible, to overlay effect envelopes and recorded sensitive receptors to visually demonstrate the potential effects that could arise from the development.

Management, mitigation and monitoring requirements were developed by MarineSpace and written into a draft schedule of conditions which was also included within the ES.

Following consultation on the final document, and technical addenda produced by MarineSpace, a Marine Licence for Area 106 and 400 was awarded and subsequently, dredging under the new licence has begun.

Recent Marine Aggregate Clients

- Hanson Aggregates Marine Ltd
- CEMEX UK Marine Ltd
- Lafarge Tarmac Marine Ltd
- Volker Dredging Ltd
- Britannia Aggregates Ltd
- DEME Building Materials
- Boskalis Westminster
- The British Marine Aggregate Producers Association

MarineSpace is registered with the Achilles Utilities Vendors Database (UVDB)
Supplier Number: 094974
