

## Capability Statement

### Offshore Oil and Gas

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to the offshore oil and gas sector

### Our Vision

*To work collaboratively with our clients, and with due consideration for the sensitivity of the marine environment, to provide consistently high quality, reliable advice regarding the planning, consenting, development, operation and monitoring of their projects.*

With our team of experienced and well informed consultants MarineSpace is able to offer our clients specialist environmental, consenting, project management and project delivery advice for a wide range of oil and gas related exploration, development and monitoring activities. Typical services include technical input on desk top studies, route and site selection, environmental assessment, survey contractor selection / management, marine survey design, environmental monitoring programme management, data interpretation, technical reporting and Quality Assurance.

Specifically, MarineSpace is able to provide the following services and products in the following areas:

- Permitting, Consenting and Compliance including Policy Advice
- Project Management
- Stakeholder Engagement
- Feasibility and Site Selection Studies
- Marine Survey Design, Implementation and Management, including Offshore Client Representation
- EIAs and Marine Planning Impact Assessments
- Habitat Regulations Assessments
- Environmental Baseline Surveys
- Environmental Monitoring Programmes
- GIS, Data Interpretation, Presentation and Management
- Environmental Due Diligence
- Decommissioning Advice and Guidance

## Capability Statement

### Offshore Oil and Gas

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to the offshore oil and gas sector

## Key Benefits of Using MarineSpace

- Extremely experienced staff
- Strong work ethic and project delivery history
- Extensive knowledge of marine consenting and environmental issues
- Excellent knowledge of the regulatory processes for all marine developments
- Expertise across a range of industries
- Ability to deliver both high-level strategic and targeted technical advice

## Project Case Study

MarineSpace was employed by a contractor on behalf of Repsol S.A. to provide expertise for offshore biological seabed survey data acquisition, the interpretation of data collected during surveys and the subsequent reporting of findings.

The work, located in the Canaries Channel off NW Africa was completed as part of planned field development activities.

MarineSpace staff designed and managed investigation of the seabed surrounding 6 proposed well sites, located between 54 and 73 km from the eastern coast of Lanzarote and Fuerteventura during deep water ROV surveys. Offshore support was also supplied by MarineSpace associates during the surveys.

MarineSpace's in-house ecology team and specialist associates, analysed the ROV survey data and stills photographs to assess the type and abundance of species within the survey areas surrounding the well sites and diapir locations.

To present the outcomes of the biological seabed survey in the field report, raw data provided from the survey operations were analysed by MarineSpace's GIS team to plot the survey positions and model the bathymetries surrounding the well sites and diapir features.

## Recent Oil and Gas Clients

- DONG Energy
- Perenco UK
- Centrica plc
- Repsol S.A.

MarineSpace is registered with the Achilles First Point Assessment (FPAL) system  
Supplier Number: 10054614
