

Capability Statement

Stakeholder Engagement

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to clients operating in marine and coastal environments

Our Vision

To work collaboratively with our clients, and with due consideration for the sensitivity of the marine environment, to provide consistently high quality, reliable advice regarding the planning, consenting, development, operation and monitoring of their projects.

With our team of experienced and well informed consultants MarineSpace is able to offer our clients specialist environmental, consenting, project management and project delivery advice and guidance for a wide range of marine and coastal development projects. MarineSpace's core services include technical input on desk top studies, route and site selection, environmental assessment, survey contractor selection / management, marine survey design, environmental monitoring programme management, data interpretation, technical reporting and Quality Assurance. Additionally, MarineSpace have a proven track record in designing and delivering targeted stakeholder engagement and management programmes to facilitate consultation and consenting operations for our clients' projects.

In respect of stakeholder engagement and management activities, MarineSpace is able to provide the following services and products:

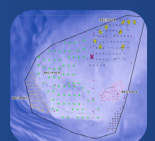

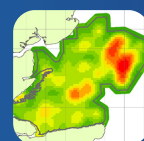

- Pre-feasibility desktop constraints studies to identify stakeholders and potential issues
- Engagement programmes to elicit the views of interested parties
- Communication and negotiation with statutory, regulatory and non-governmental bodies
- Authoring and dissemination of project briefing notes
- Development of stakeholder databases
- Design and production of project posters, publicity material and newsletters
- Organisation and delivery of open days and road shows
- Production of stakeholder engagement documentation for compliance purposes

Capability Statement

Stakeholder Engagement

MarineSpace provides specialist marine environmental assessment, consenting and monitoring advice to clients operating in marine and coastal environments

Key Benefits of Using MarineSpace

- Extremely experienced staff
- Strong work ethic and project delivery history
- Extensive knowledge of marine consenting and environmental issues
- Excellent knowledge of the regulatory processes for all marine developments
- Expertise across a range of industries
- Ability to deliver both high-level strategic and targeted technical advice

Project Case Study

Since 2006, MarineSpace staff have managed stakeholder engagement for the East Channel Association group of dredging companies in relation to aggregate dredging operations in the eastern English Channel. The engagement programme required production of a range of publicity material, direct communication with stakeholders and organisation and delivery of annual stakeholder meetings.

Over eleven years of engagement activity MarineSpace has produced numerous project updates, authored and submitted a range of engagement reports to regulators for compliance purposes and delivered public presentations to provide updates to interested parties. The stakeholder group was composed of a range of organisations and individuals including regulators, statutory bodies, industry representatives, fisheries organisations, NGOs, environmental pressure groups, landowners and private individuals. The make-up of the group required deployment of a range of engagement approaches and careful consideration of outcome management.

Throughout the process MarineSpace has been required to collate and disseminate a range of technical and scientific information. The diversity of stakeholder knowledge required that this information was presented in a range of styles and formats to ensure that all parties were properly informed in a timely and productive way.

Recent Stakeholder Engagement Clients

- The East Channel Association
- Transmission Capital Partners Ltd
- Morlais Energy Ltd
- Tidal Lagoon Power Ltd
- Hanson Aggregates Marine Ltd
